#1 Alignment Putting System in Golf

SeeMore

Experience A SeeMore Putter

SeeMore solves the number one problem in putting. SeeMore's patented and proven RifleScope Technology (RST and RST2) is like having a gun sight on your favorite putter.

Better alignment. Better posture. Better stroke. Every time. More made putts. Hide the Red Dot. Line up the 2 white lines. Fire away. It's that simple.

And SeeMore offers the best customer service in the industry. Tour level attention and instruction and advice. Ask anyone who already knows about SeeMore. Check it out online at SeeMore.com or ask your club fitter about SeeMore.

SeeMore. Not just another putter. A putting system that will help you find the best putting of your life. Forever.

RifleScope Technology and Pat O'Brien

Not Just Game Improvement. Player Improvement.

Pat O'Brien is one of the top putting coaches in the world. SeeMore's Riflescope Technology (RST) helps him Teach his students to Win. Students like you. Or European tour player Steven Tiley (pictured with Pat to the right.) Or Pat's star student Zach Johnson, one of the best players in the world. Zach won Events in 2003, 2004, 2007, 2008, 2009, and 2010. He Owns the Record for Best Putting average. He won the Masters.

Hiding the Red Dot improves your set up, Aim, and stroke. Forever.

SeeMore offers lifetime teaching support, and the best customer service you've ever experienced. Get a SeeMore putter. It will help you become a great putter. Fundamentally. SeeMore. Not just a putter. A putting system.

 Hide the **Red** Dot... It's that simple. Once the red dot is hidden, you'll know your putter is aligned correctly. Aim the white line and watch your game improve.

SiSeries

The SiSeries putters feature precision cast 303 stainless steel heads with thermo plastic urethane (TPU) face inserts and SeeMore's patented RifleScope Technology (RST) alignment system, for a true reference point for perfect alignment and set up on every putt. SiSeries putters feature an expanded sweet spot, and a softer feel and slightly less rebound for those preferring the performance of a high performance elastomer insert.
